*Resumé Architect*, February 2011 - present

- ▶ Write in one format (Markdown), convert to many formats (PDF, HTML, ODT, DOCX, and more)
- ▶ Style HTML output with CSS and PDF output with a custom L<sup>A</sup>T<sub>E</sub>X header
- ▶ Use a simple pre-processor to define per-format operations on the Markdown input or its parts, such as moving contact information to the top right of the page in both HTML and PDF output.
- ▶ Use a text-based résumé when needed in a pinch
- ▶ Use version control, including free hosting on Github
